

DICOM Correction Item

Correction Number		CP-217
Log Summary: Add Icon Image Sequence to SR IMAGE value type		
Type of Modification	Name of Standard	
Addition	PS 3.3, 3.4 2000	
Rationale for Correction		
When rendering a report that references images, it is desirable to be able to show some stylized or iconic representation of them that is specific to the particular image. In order to make this easier (and possible in the absence of the images themselves), it is proposed that the Icon Image Sequence used in the DICOMDIR be added to the IMAGE Value Type.
