

## DICOM Correction Proposal Form

Tracking Information - Administration Use Only	
Correction Proposal Number	CP-240
STATUS	May 2001 Voting Packet
Date of Last Update	2001/03/14
Person Assigned	David Clunie <a href="mailto:dclunie@idt.net">dclunie@idt.net</a>
Submitter Name	Tom Probasco <a href="mailto:tprobasco@endosonics.com">tprobasco@endosonics.com</a>
Submission date	2000/10/27

Correction Number	CP-240
Log Summary: Reality check on CD-R sector recording modes	
Type of Modification	Name of Standard
Clarification	PS 3.12 2000
<p>Rationale for Correction</p> <p>The sector format for CD-R recording is specifically defined to be Mode 2/Form 1 (in order to support recording of CD-XA which is used for CD-Interactive).</p> <p>In reality, almost everyone is writing CD-Rs with Mode 1, which is the default used by off-the-shelf CD-R burning software. Both Mode 1 and Mode 2/Form 1 encapsulate 2048 data bytes.</p> <p>It is proposed to recognize this reality and amend PS 3.12 accordingly</p>	
<p>Sections of documents affected</p> <p>PS 3.12 F.2</p>	
Correction Wording:	

### F.2 MEDIA FORMATS

#### F.2.1 Physical format

The physical format of DICOM CD-R discs shall comply with the applicable definitions within ISO/IEC 10149, Part II: CD-WO in Orange Book and CD-ROM-XA (extended Architecture) **(if Mode 1 sectors are not used)**, with the additional modifications described in sections F.2.1.1 and F.2.1.2.

##### F.2.1.1 SECTOR FORMAT

All DICOM files and all data that comprise the ISO 9660 file system of the DICOM CD-R disc shall be stored **either**:

- **within Mode 1 sectors, or**
- within Mode 2, Form 1 sectors with CD-ROM-XA File Number = 0, Channel Number = 0 and Coding Information Byte = 0.
