Meeting Minutes

DICOM WORKING GROUP SEVEN (RADIOTHERAPY)

October 31, 2024

Participants:

Jim Percy (AAPM Affiliate) and DICOM WG 7 Co-Chair
Bruce Curran (AAPM)
Bruce Rakes (Mevion)
David Holst
David Wikler (IBA)
Kari Jyrkkala (Varian)
Marcus Bergman (RaySearch)
Uli Busch (personal)
Yulong Yang (AAPM)
Emily Hoefler (NEMA)

Meeting came to order at 9.05am EDT

We reviewed the following Correction Proposals:

cp_RT185 Add Patient to Equipment Matrix Examples
Uli wants to continue to postpone, even cancel this one.

cp_RT214 4D Imaging Support
Kari has lost interest in pushing this one forward; he does not see anything being done by the imaging companies and we will still have to deal with what they have today.

cp_RT247 Add RT specific Plan Approvals
David presented his inclusion of the Protocols approval module. Although we are uncomfortable with the use of the name "protocol", wording has now been included to indicate that RT is using it in a very specific way. Latest version will be uploaded for WG6

cp_RT261 Alternate Machine Module for RTPlan

Jim Percy laid out the plan for two initial WG meetings on just this. Invitations will go out very soon now that the Doodle is closed. After the first two, we will decide as a group what schedule to use after that.

Cp_263 (new) Add Salvage details in RT Treatment and RT Ion Treatment Record

Kari introduced a proposed new CP to bring in an alternate module when a Record is not created properly and the TMS or TDD needs to -record a basic MU. It was accepted as an idea and will be put forward for a full cp number from WG6.

Meeting adjourned at 10.45am EDT
