	Review of September WGM-The Chair gave an overview of the September Working Group meeting in Baltimore, MD, US.		
	3 proposals were voted on in IHE Radiology for priority ranking. The first one included FHIRcast and was rated the number one priority. The second two were tied.

	V2 to FHIR mapping Project Proposal: PSS-2123 - Imaging ServiceRequest Profile Draft. We reviewed this with WG-6 during the Working Group Meeting. WG-20/HL7 II reviewed during the 10/4 meeting. We are hoping the HL7 Orders and Observations joins this as a cosponsor. There was a request to add in OMG messages. Specific v2 messages to include will be delineated in the PSS phase. It is expected this will include at minimum ORM and OMI. There is a request from ophthalmic to add OMG messages, as it is used in IHE Eye Care profiles. This work would ideally cover non-radiology imaging as well. Request to review again next week prior to voting. Discuss R5 ballot next time.
