Correction Number	CP-217
Log Summary: Add Icon Image Sequence to SR IMAGE value type	
Type of Modification	Name of Standard
Addition	PS 3.3, 3.4 2000
Rationale for Correction	
When rendering a report that references images, it is desirable to be able to show some stylized or iconic representation of them that is specific to the particular image. In order to make this easier (and possible in the absence of the images themselves), it is proposed that the Icon Image Sequence used in the DICOMDIR be added to the IMAGE Value Type.
