

DICOM Correction Proposal Form

Tracking Information - Administration Use Only	
Correction Proposal Number	CP-232
STATUS	Proposed
Date of Last Update	2000/11/07
Person Assigned	David Clunie dclunie@idt.net
Submitter Name	David Clunie dclunie@idt.net
Submission date	2000/10/17

Correction Number	CP-232
Log Summary: Allow additional optional query keys at patient and study level	
Type of Modification	Name of Standard
Clarification	PS 3.4 2000
<p>Rationale for Correction</p> <p>The Query SOP Classes specifically call out that any attribute at the appropriate entity level can be used as an optional query key, for the Series and Instance levels, in the tables of query keys.</p> <p>For some reason, the same privilege is not accorded at the Patient and Study levels, even though one can clearly do this as a Standard Extended SOP Class.</p> <p>This proposal amends the Patient and Study tables to be consistent with the Series and Instance tables.</p>	
<p>Sections of documents affected</p> <p>PS 3.4 C.6.1.1.2, C.6.1.1.3, C.6.2.1.2</p>	
Correction Wording:	

C.6.1.1.2 Patient Level

...

**Table C.6-1
PATIENT LEVEL ATTRIBUTES FOR THE PATIENT ROOT
QUERY/RETRIEVE INFORMATION MODEL**

Description	Tag	Type
Number of Patient Related Instances	(0020,1204)	O
All Other Attributes at Patient Level		<u>O</u>

C.6.1.1.3 Study Level

....

**Table C.6-2
STUDY LEVEL KEYS FOR THE PATIENT ROOT
QUERY/RETRIEVE INFORMATION MODEL**

Description	Tag	Type
Interpretation Author	(4008,010C)	O
<u>All Other Attributes at Study Level</u>		<u>O</u>

C.6.2.1.2

Study level

...

**Table C.6-5
STUDY LEVEL KEYS FOR THE STUDY
ROOT QUERY/RETRIEVE INFORMATION MODEL**

Description	Tag	Type
Interpretation Author	(4008,010C)	O
<u>All Other Attributes at Patient and Study Level</u>		<u>O</u>
