Log Summary: Duplicate NM retired/new elements in data dictionary	
Type of Modification	Name of Standard
Correction	PS 3.6 2000
Rationale for Correction	
Some data elements were renamed and had their value multiplicity changed in PS 3.6 when the revised NM object was folded into the standard, but are still present (duplicated) and flagged as "retired". This leads to problems when automatically generating code from the tables. It is proposed the retired duplicates be deleted.
