Development of shelf-ready content-

- Concept description:
- Develop a series of short documents – stories – around 700 words that can be posted on DICOM website as FAQ-type info and able to send to have these short pieces at the immediate ready when some issue blows up and media and others request written feedback with an ASAP timeline.
- **Audience:** These are not meant to be technical engineering papers. These are something a product manager or a regulator would read. ~700 words is about the length of an opinion piece, be able to give to media and use in an FAQ.

Topic / Title	Content to be included	Lead
<i>“Why doesn’t DICOM mandate security”</i>	- Possible content: DICOM is not a regulatory body	Rob

	<ul style="list-style-type: none"> - Not always the best fit solution for a particular organization 	
<i>“How can I tell if my system is exposed?”</i>	<ul style="list-style-type: none"> - We describe how to do it. 	Hans v on tcon 2019-12-17
<i>“How to turn on encryption and why”</i>	<ul style="list-style-type: none"> - Different for modalities and PACs 	Hans v on tcon 2019-12-17
<i>“How an administrator could use SHODAN to find leaks”</i>	<ul style="list-style-type: none"> - “You’ve heard about all of those exposed DICOM ports, you can find out if any of yours are exposed at your institution. Enter info into Shodan & it will tell you the open ports and IP addresses...” - Can be tricky if have dynamic IPs and such, but at least give them guidance 	Can add these to the DICOM website when complete and discuss with SIIM.
<i>“Hey administrator, have you looked at X / have you considered...?”</i>	<ul style="list-style-type: none"> - DICOM is not responsible for the deployment. We don’t want to come across as defensive, rather, explain what the reader can do 	
<i>“What to put in an RFP”.</i>	<ul style="list-style-type: none"> - Ensure content doesn’t stray into anti-trust territory. We think we can include content that is general, but helpful. - Maybe just include hyperlinks to sections? Call out the preamble, gives the mindset, intent – this could turn into a nice short piece 	
<i>One-Pager Checklist</i>	<ul style="list-style-type: none"> - Audience: For administrators, including PACS and CISOs. - Include a short, focused list, a one pager/check-list for PACS Admins and only coming from the DICOM side (noting which may be DICOM-only and which may need to be DICOM-MITA jointly developed) - The content and goal are to aim end users at NSA Manageable Network paper - Example: The real basics, Step 1: the real danger is connected to your network, many do not realize that they have holes, know your use case - Status: The WG started a draft on the call (2019-12-17). 	

5 Profile/standardizing a user authentication scheme, re: 2FA.
