Bruno will update the spreadsheet with this info. Name (Cryptic) and other options.

#### **WG-02&WG-28 XRAY & Physics**

Stephen reported that the next WG-02/28 t-con is May 11-13. The Chair will send a reminder to the group and they may submit consolidated comments or more individual comments on Sup 209.

#### **WG-03 Nuclear**

Update: This was completed on May 12.

#### **WG-07 Radiation Therapy**

---

The meeting took place on April 30.

It was concluded that Radiotherapy's use of DICOM is somewhat different from that of radiology (e.g. strong use of UPS); radiology was the basis for the current draft Sup209. WG-07 also called attention to 6-7 level deep sectioning and suggested to break Section 5 into 3 sections to avoid such deep levels. Members took note but confirmed the need to keep services in one section.

It was decided that more frequent consultations with WG-07 will be needed.

### **WG-12/WG-01      Ultrasound/Cardiology**

Stephen reported that a doodle was created, and he sent an e-mail on May 5 to the Co-Chairs as a first step for scheduling a presentation.

**Secretary's Note:** The Co-Chairs responded positively. Surveying the membership for the best date will be the next step.

### **WG-15 Mammography**

The input received from WG-15 will be considered in the further work by Members on Sup 209.

### **WG-16 MRI**

Update name Section in MR 16 to Cryptic. Had the meeting with Paul Seifert. Used Security template to discuss Security topic. Let's take template and review the sections. Antje presented.

### **WG-21 CT**

The Sup 209 presentation was made on April 29.

WG-21 members were anxious to have machine-readable Part 2 and create a machine readable DSC. They also expressed interest in being able to create automatically a machine-readable DSC from their own systems. The companion proposal for a new Supplement for machine-readable DCS was described to WG-21.

Herve and Bruno described the constraint on the DICOM formatting as the human readable format is the starting point and must also be preserved.

### **WG-26 Pathology**

The presentation to WG-26 was made on May 5.

This modality, pathology, is at the beginning of the "DICOM-ization" process. They had several connectathons but none of the manufacturers have developed a DCS yet.

The user Co-Chair of WG-26 has had extensive experience with DCS' as he is in charge of informatics for all modalities in a regional health care provider organization. His comment, after the presentation, was that the template will be generating better DICOM Conformance Statements.

---

WG-26 will submit theoretical comments by the end of June and will provide practical comments about their specialty in the 4<sup>th</sup> quarter of 2020 based on more connectathon experience; they plan ongoing virtual connectathons.

**WG-28 Physics**

Same as WG-02 above.

**WG-33 Data Archive and Management**

This is scheduled for June 9.

Antje suggested that feedback from more users such as the informatics and PACS experts in WG-33 would also be helpful for the further development of the Supplement 209. Additionally, feedback from Change Healthcare and similar companies should also be solicited.

**Secretary's note:** WG-33 Co-Chairs and Secretariat (SIIM) supported the presentation. The CO-Chairs' invitation was sent to WG-33 on May 10.

6. Modalities—Herve question: have an additional question for processing applications: Do we need to document what processing applications are doing with the various elements in objects they received in terms of “used” vs “ignored” ?”

**7. Next Sup 209 T-cons:**
