Add the following section to all occurrences, where the Referenced Study Sequence (0008,1110) or RT Referenced Study Sequence (3006,0012) is invoked:

X.Y.Z  Referenced SOP Class UID

The SOP Instance Reference Macro included in this sequence contains the Referenced SOP Class UID (0008,1150). As there is no meaning of a SOP Class UID at the Study level no semantics shall be derived from the value provided by this attribute.

As the attribute is of type 1 and there is the need to provide a value when creating an instance, it is recommended but not mandated to utilize the SOP Class UID of the Detached Study Management SOP Class.
