Correction Number CP-1292

Log Summary: Concept Code For Beam Delivery Instruction

Name of Standard
PS 3.3 2011 Part 16

Rationale for Correction:
The Concept Code used in IHE-RO to support the indication for TREATMENT or CONTINUATION in Beam Delivery Instruction is pretty important. However, in the current profile version, this concept code is still a private one indicated by a designator of 99IHE2008. However, that scheduled parameters will be used widely for all treatment modalities in future as well in 2nd Generation. Therefore it is indicated to have a standard code for that purpose.
