Correction Number CP-1761

Log Summary: Correct Acquisition Context and DateTime in Confidentiality Profile Attributes

Name of Standard
PS3.15

Rationale for Correction:

There are two inconsistencies in Part 15’s Basic Application Level Confidentiality Profile:

- The Action Code for the Acquisition Context Sequence (0040,0555) is X whereas this is a Type 2 sequence in Part3’s Table C.7.6.14-1. Acquisition Context Module Attributes, which is a mandatory Module in many IODs; its Action Code should be X/Z

- The Action Code for the Acquisition DateTime attribute (0008,002A) is X/D whereas this is a Type 2 attribute in Part3’s Table C.24-2. Encapsulated Document Module Attributes; its Action Code should be X/Z/D

Correction Wording:
Amend DICOM PS3.15 as follows (changes to existing text are bold and *italicized* for additions and *struckthrough* for removals):

### Table E.1-1. Application Level Confidentiality Profile Attributes
