Correction Number CP-1962

Log Summary: Changes to Abomen-related anatomy concepts in SNOMED CT

Name of Standard

PS3.16

Rationale for Correction:

SNOMED has proposed inactivating 416949008 "abdomen and/or pelvis structure", redefining 113345001 "abdominal structure" to mean "abdominalpelvic", and adding a new code 787075000 "structure of abdomen proper" - we have urged them not to make this change that redefines the meaning of the existing code 113345001, which has always been a sibling (not parent) of 12921003 "pelvic structure".

Discussions have led to the proposal to include in SNOMED specific concepts that relate to cross-sectional regions that do not necessarily have traditional clinical anatomical correlates, e.g., "Abdominal cross-sectional segment of trunk", but that does not address the legacy issue of the installed base and archived images, nor the comparison of cross-sectional and non-cross-sectional regions.

Correction Wording:
Amend DICOM PS3.16 as follows (changes to existing text are bold and underlined for additions and struckthrough for removals):

### J SNOMED Retired Codes

Table J-1. SNOMED Codes Retired from DICOM Use

<table>
<thead>
<tr>
<th>Retired Code Value</th>
<th>Code Meaning</th>
<th>Replacement Code</th>
<th>Notes</th>
</tr>
</thead>
</table>

### L Correspondence of Anatomic Region Codes and Body Part Examined Defined Terms

Table L-1. Corresponding Codes and Terms for Human Use

<table>
<thead>
<tr>
<th>Coding Scheme Designator</th>
<th>Code Value</th>
<th>Code Meaning</th>
<th>Body Part Examined</th>
<th>SNOMED-RT ID (Retired)</th>
<th>FMA Code Value</th>
<th>UMLS Concept UniqueID</th>
</tr>
</thead>
</table>
