DICOM Correction Proposal

**Log Summary:** Wording improvement for C.8.8.5.4 and use of Study in RTSS references

**Name of Standard**
PS3.3

**Rationale for Correction:**
New readers of the standard that were not part of the early development need more explanation guidance to what to do to get past the mistaken use of SOP Class in a Study Reference.

**Correction Wording:**

### Update in PS3.3, C.8.8.5 Structure Set Module

**Table C.8-41. Structure Set Module Attributes**

</table>

**C.8.8.5.4 SOP Class UID in RT Referenced Study Sequence**

Since RT Referenced Study Sequence (3006,0012) is Type 3, the Attribute may be omitted.

If RT Referenced Study Sequence (3006,0012) is present with an Item, the a SOP Class UID is required by the called Macro even though a Study can contain multiple SOP Classes. Therefore, if the Study contains Instances of different SOP Classes, it is recommended that implementers use of...
the Detached Study Management SOP Class (Retired) of 1.2.840.10008.3.1.2.3.1 for may be used in
Referenced SOP Class UID (0008,1150).
