

## DICOM Correction Proposal Form - Final Text

Tracking Information - Administrator Use Only	
Correction Proposal Number	CP-38
STATUS	approved - voting-3
Date of Last Update	01-20-95
Person Assigned	Don Van Syckle

Log Summary: Include Attribute Tag (AT) as a VR which needs to be swapped	
Submitter Name Don Van Syckle	Submission date 01-18-95
Type of Modification Inconsistency	
Name of Document PS 3.5	Version Number
<p>Rationale for Correction</p> <p>The VR Attribute Tag (AT) is defined to be a pair of 16-bit unsigned integers. Therefore, it should be included in the list of VRs which may need swapping when discussing byte ordering (e.g. little endian to big endian).</p>	
<p>Sections of document affected</p> <p>7.3, 1st bullet under last paragraph (pg 26)</p>	
<p>Suggested Wording of Correction</p> <p>add value AT to list by replacing the bullet with:</p> <p>- 2-byte US, SS, OW and each component of AT</p>
