

## DICOM Correction Item

Correction Number CP-1020	
Log Summary: Fix arrow in Figure A.4.1-1 in PS 3.2.	
Type of Modification Correction	Name of Standard PS 3.2 2009
Rationale for Correction: The text for "AE <3>" and "Remote Real-World Activity Z" describes only an association request/initiation while Figure A.4.1-1 for AE <3> shows only an acceptance. Also, AE 3 is missing <> and there are superfluous spaces (highlighted for clarity) before the -1 in A.4.1.1-1 in several places.	
Sections of documents affected PS3.2 Section A.4.1.1	
Correction Wording:	

*Modify PS 3.2, Section A.4.1.1 as follows:*

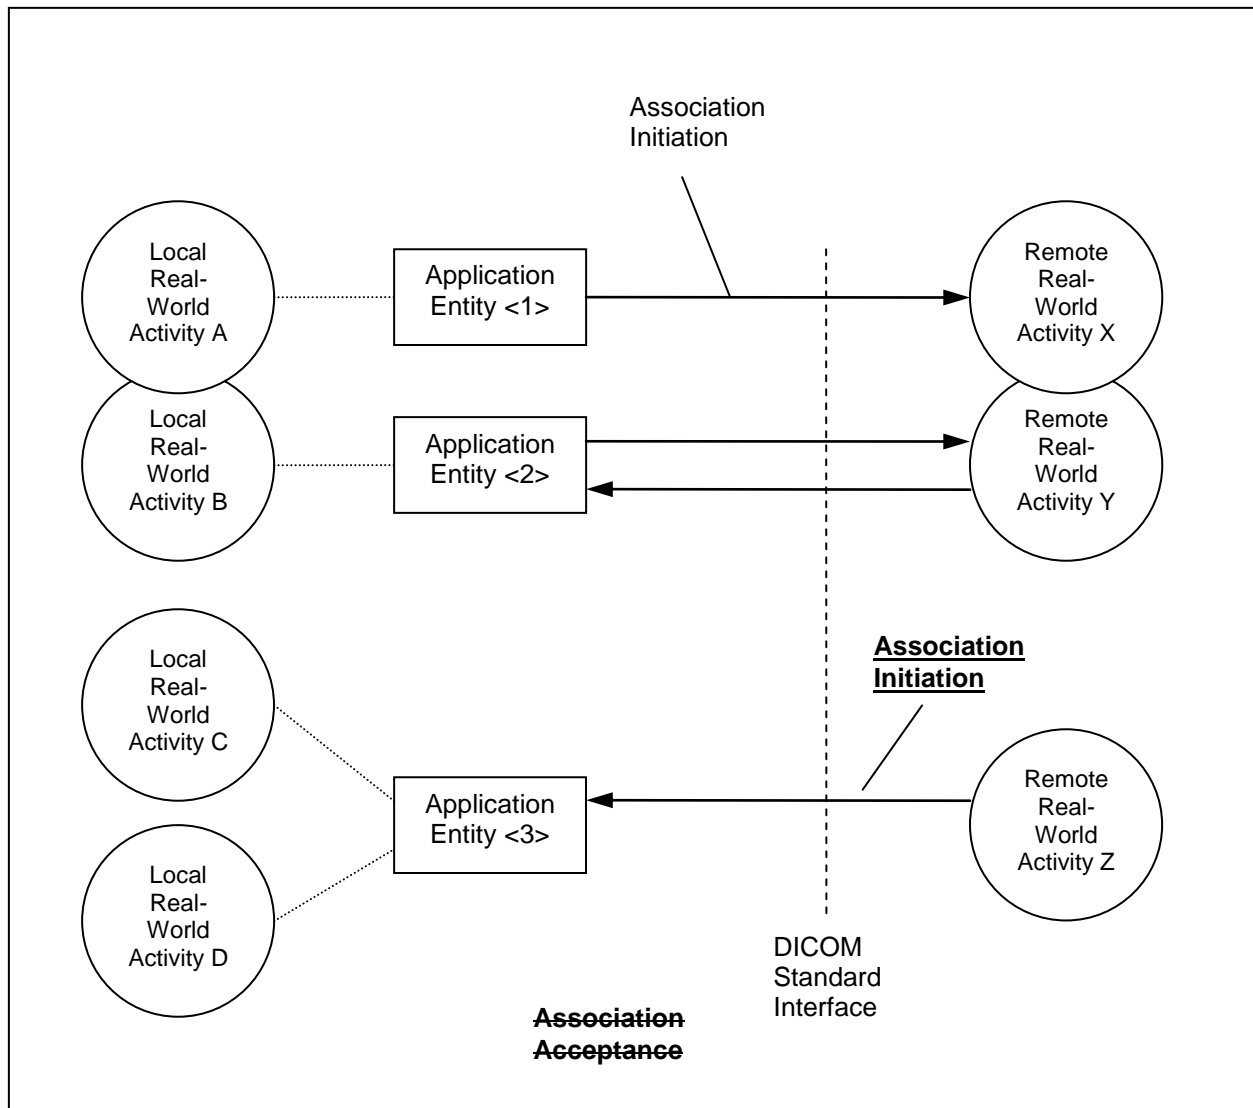

### A.4.1.1 Application Data Flow

...

In this illustration, according to figure A.4.1-1, an occurrence of local Real-World Activity A will cause local Application Entity <1> to initiate an association for the purpose of causing Real-World Activity X to occur remotely. It also shows that Real-World Activities B and Y are interactively related via Application Entity <2>, with B being local and Y Remote, and that local Application Entity <3> expects to receive an association request when remote Real-World Activity Z occurs so that it can perform Real-World Activity C and/or D. When the performance of Real-World activities relies on interactions within the implementation, one may depict the circles as overlapping as shown in Figure A.4.1-1. Any such overlap shall be discussed in this section of a Conformance Statement.

...

*Modify PS 3.2, Figure A.4.1-1 to appear as follows:  
(Specifically reverse the direction of the bottom arrow, fix the label for AE <3>, and fix the figure title*
