

### DICOM Correction Item

Correction Number		CP-1056
Log Summary: Series Description Code Sequence number of items		
Type of Modification	Name of Standard	
Correction	PS 3.3 2009	
Rationale for Correction		
Series Description Code Sequence was added in CP 860, but the number of items permitted in the sequence was not specified.		
It is proposed that only a single item be permitted (since experience with Scheduled and Performed Protocol Code Sequence has shown that allowing multiple items undermines its utility).		
Sections of documents affected
