## Correction Number
CP-1095

## Log Summary:
Duplicate Exposure Time Codes

## Name of Standard
PS 3.16-2011

## Rationale for Correction:
There are two different Codes defined for "Exposure Time"

One should be retired, and replaced by the remaining in the Template containing it. The code used in a User Optional content item in TID 10003 is retired; the code used in a Mandatory content item in TID 10013 is retained.

Although retired, existing implementations and SOP Instances that use the retired code are still compliant.

## Sections of documents affected
