

DICOM Correction Proposal

STATUS	Final Text
Date of Last Update	2011/08/15
Person Assigned	Bas Revet
Submitter Name	Herve HOEHN
Submission date	2011/01/26

Correction Number	CP-1129
Log Summary: Correct Part 5 rule on Group 0004 in Sequence	
Name of Standard PS 3.5 2011	
Rationale for Correction: Part 5, in section 7.5.1 Item Encoding Rules states that "Data Elements with a group of 0000, 0002, 0004 and 0006 shall not be present within Sequence Items." While this statement is true for group 0000, 0002 and 0006, it is incorrect for group 0004. PS 3.3 2009, TableF.3-3 Directory Information Module lists data elements from the group 0004 that shall belong to a Sequence Item of Directory Record Sequence (0004,1220). This CP removes 0004 from the list of disallowed groups.	
Sections of documents affected PS 3.5 Section 7.5.1	
Correction Wording:	

7.5.1 ITEM ENCODING RULES

...

Data Elements with a group of 0000, 0002, ~~0004~~ and 0006 shall not be present within Sequence Items.
