

DICOM Correction Proposal

STATUS	Final Text
Date of Last Update	2011/10/19
Person Assigned	Ulrich Busch (ulrich.busch@varian.com)
Submitter Name	Walter R. Bosch (wbosch@radonc.wustl.edu) Sue Reilly (Sue.Reilly@Elekta.com)
Submission Date	2011/03/22

Correction Number	CP-1133
Log Summary: RT ROI Identification Sequence Baseline CID Clarification	
Name of Standard PS 3.3 2011	
Rationale for Correction: In the RT ROI Observations Module, the >RT ROI Identification Code Sequence (3006,0086) references Baseline CID 96 as the Context ID for its Code Sequence Macro. However, there is no evidence that this Context ID was ever defined. The original intent of this Sequence was to provide uniform encoding of ROI identifiers. In practice, the use of a single code value to identify an ROI proved to be inadequate. Since this Sequence will be made obsolete in Supplement 147, 2nd Generation RT Objects, the recommendation is to change the wording to "No Baseline CID defined" instead of defining an inherently inadequate Baseline CID 96.	
Correction Wording:	

Amend Section C.8.8.8, Table C.8-44

Table C.8-44—RT ROI OBSERVATIONS MODULE ATTRIBUTES

Attribute Name	Tag	Type	Attribute Description
RT ROI Observations Sequence	(3006,0080)	1	Introduces sequence of observations related to ROIs defined in the ROI Module. One or more items may be included in this sequence.
...			
>RT ROI Identification Code Sequence	(3006,0086)	3	Introduces sequence containing Code used to identify ROI. If this sequence is included, only one item shall be present. Baseline Context ID Number = 96. See Section 5.3 for further explanation.
>>Include 'Code Sequence Macro' Table 8.8-1			<u>Baseline CID-96. No Baseline Context ID is defined.</u>
