| Correction Number                                                               | CP-1171                                                                                                                                                                                                                                                                                                  |
| Log Summary: Do not include Encapsulated Document on Retrieve without Bulk Data |                                                                                                                                                                                                                                                                                                          |
| Name of Standard                                                                | PS 3.4-2011                                                                                                                                                                                                                                                                                              |
| Rationale for Correction                                                        | Attribute Encapsulated Document (0042,0011) may be quite large. Therefore, it should not be included into the Dataset sent by a SCP of the Composite Instance Retrieve Without Bulk Data Service.<br><br>In addition the attribute name of Pixel Data Provider_URL (twice) and the attribute tag (once). |
| Sections of documents affected                                                  | PS 3.4 Y.3.3, Z.1.3                                                                                                                                                                                                                                                                                      |
| Correction Wording:                                                             |                                                                                                                                                                                                                                                                                                          |

### Y.3.3 New Object Creation at the FRAME level

...

- The new Composite Instance shall have the same values for the Attributes of the Image Pixel Module of the source Composite Instance except that the Pixel Data **Provider** URL (0028,7FE0) attribute shall not be present, Pixel Data (7FE0,0010) shall be replaced by the subset of frames, as specified in section Y.3.3, and Number of Frames (0028,0008) shall contain the number of frames in the new Composite Instance.

### Z.1.3

#### Z.1.3 Attributes Not Included

The attributes that shall not be included in the top level of the Dataset sent by an SCP of this Service are as defined in Table Z.1-1

**Table Z.1-1  
Attributes not to be Included in Instances Sent**

| Attribute                             | Tag                                        |
|---------------------------------------|--------------------------------------------|
| Pixel Data                            | (7FE0,0010)                                |
| Pixel Data <b><u>Provider</u></b> URL | <b>(<del>7FE00028,01207</del><br/>FE0)</b> |
| Spectroscopy Data                     | (5600,0020)                                |
| Overlay Data                          | (60xx,3000)                                |
| Curve Data                            | (50xx,3000)                                |
| Audio Sample Data                     | (50xx,200C)                                |
| <b><u>Encapsulated Document</u></b>   | <b>(0042,0011)</b>                         |

Note: This implies that the pixel data within Icon Image Sequence (0088,0200) Items will be preserved.

The Waveform Data (5400,1010) attribute shall not be included within the Waveform Sequence (5400,0100).
