

## DICOM Correction Proposal

STATUS	Final Text
Date of Last Update	2012/03/22
Person Assigned	Harry Solomon
Submitter Name	Harry Solomon ( <a href="mailto:harry.solomon@ge.com">harry.solomon@ge.com</a> )
Submission Date	2011/07/27

Correction Number	CP-1178
Log Summary: Additional Procedure Intents in CID 3629	
Name of Standard	PS 3.16 2011
Rationale for Correction	The intent and scope of CID 3629 Procedure Intent is clarified, and several addition intents are added.
Correction Wording:	

*PS 3.16 Annex B*

### CID 3629 Procedure Intent

**This Context Group specifies the intent for a procedure or a procedure step, depending on the context of invocation. The intent for a procedure step may be different than that of the procedure in which it occurs.**

- Notes:**
- 1. For example, a surgical biopsy procedure may have “Diagnostic Intent”, while the imaging procedure step within that procedure may have “Guidance Intent”.**
  - 2. Collection of specimens is generally “Diagnostic Intent”; “Forensic Intent” is typically used for autopsies; “Palliative Intent” and “Adjuvant Intent” may apply to certain radiotherapy procedures.**
  - 3. In SNOMED-CT, “Staging Intent” is a subsidiary concept (refinement) of “Diagnostic Intent”. The following are subsidiary concepts of “Therapeutic Intent”: Adjunct, Adjuvant, Curative, Neo-adjuvant, Prophylactic, and Supportive. Prophylactic is also a subsidiary concept of Preventive intent.**

**Context ID 3629  
Procedure Intent**

Type: Extensible

Version: **2003032720120322**
