6	Submission Date	2014/02/24

7	Correction Number CP-1373	
8	Log Summary: Add Alzheimers Disease PET Radiotracers	
9	Name of Standard	
10	PS 3.16 2014b	
11	Rationale for Correction:	
12	The Pittsburgh compound B amyloid agent is not included in the current list, and even though its clinical use may be superceded by flourine based agents now available, for comparative research purposes a code is needed.	
13		
14	Use the name "Pittsburgh compound B" or "PIB", since there seems to be no USAN, and its IUPAC name is not recognizable:	
15	("[N-methyl- <sup>11</sup> C]2-(4'-methylaminophenyl)-6-hydroxybenzothiazole")	
16		
17	There is currently no SNOMED code.	
18	Additional F <sup>18</sup> amyloid and tau agents are now also available.	
19	Use existing UMLS terms where they are specific to the radiotracer (and not just the compund).	
20	Additionally, trade and experimental names are added to existing concepts for reference.	
21	Correction Wording:	

Amend DICOM PS 3.16 Content Mapping Resource - Context Groups as follows:
