Correction Number  CP-1768

Log Summary: Correct PS3.17 Figure FFF.2.3-1

Name of Standard
PS3.17 2018b

Rationale for Correction:
The Figure FFF.2.3-1: “Example of Usage of Photometric Interpretation” of PS3.17 does not reflect the original figure of the Supplement 139 Figure Z.2.3-1.

Correction Wording:

**Change in PS 3.17 2017d: change Figure FFF.2.3-1**

The current Figure FFF.2.3-1 of PS3.17 is confusing because it does not show clearly which system (A and B) displays white or black blood vessels when Photometric Interpretation is MONOCHROME1 and 2.
Need to change the Figure FFF.2.3-1 to show clearly that:

**System A**
- displays black blood vessels when Photometric Interpretation is MONOCHROME2
- displays white blood vessels when Photometric Interpretation is MONOCHROME1.

**System B**
- displays white blood vessels when Photometric Interpretation is MONOCHROME2
- displays black blood vessels when Photometric Interpretation is MONOCHROME1.

as shown in the original figure hereafter of Supplement 139:
Figure Z.2.3-1
Example of usage of Photometric Interpretation
