Submission Date	2018/05/05

Correction Number	CP-1836
Log Summary:	Remove instance attributes from QIDO series includeall
Name of Standard	PS3.18 2018e
Rationale for Correction:	<p>Table 6.7.1-2a QIDO-RS Series Returned Attributes lists attributes to return for Series level queries. It includes the statement:</p> <p style="padding-left: 40px;"><i>All available Instance Level DICOM Attributes if the "includefield" query key is included with a value of "all"</i></p> <p>The corresponding statement in Table 6.7.1-2 QIDO-RS Study Returned Attributes says "all available Study level" attributes, and the corresponding statement in Table 6.7.1-2b QIDO-RS Instance Returned Attributes says "all available Instance level" attributes.</p> <p>The statement in Table 6.7.1-2a should refer to Series level attributes, not Instance level.</p>
