

DICOM Correction Proposal Form

Correction Number		CP-293	
Log Summary: Wrong value multiplicity Coordination Curve attributes			
Type of Modification	Name of Standard		
Clarification	PS 3.6 2001		
<p>Rationale for Correction</p> <p>The attributes Coordinate Start Value (50xx,0112) and Coordinate Step Value (50xx,0114) (Table C.10-2) can have more then one value according the attribute description:</p> <p>For example, the Coordinate Start Value (50xx,0112) description</p> <p style="padding-left: 40px;">The starting point of a one dimensional data list. Required if Curve Data Descriptor is used. One value for each dimension. The Value Representation is given in Data Value Representation (50xx,0103).</p> <p>The value multiplicity of both attributes is defined 1 in PS 3.6, this should be 1-n.</p>
