

## DICOM Correction Proposal Form

Correction Number CP-336	
Log Summary: Clarify behavior with duplicate SOP Instances in a Storage Commitment	
Type of Modification Clarification	Name of Standard PS 3.4
Rationale for Correction  What is the correct behavior when an SCU requests Storage Commitment for the same SOP Instance multiple times in the same request (duplicate SOP Instances)?  The Standard does not currently appear to forbid this strange type of request. Because of issues with appropriate SCP responses to such a request, it is made forbidden.	
Sections of documents affected  PS 3.4 Section J.3.2.1.1	
Correction Wording:  Add new sub-section J.3.2.1.1.3 and reference
