

DICOM Correction Item

Correction Number	CP-569	
Log Summary:	Add Admission (Visit) ID to PPS and Composite IODs	
Type of Modification	Name of Standard	
Addition	PS 3.3-2004 PS 3.4-2004	
Rationale for Correction:		
<p>In certain domains, patients are identified (e.g., on the wristband) by Admission (i.e., Visit) ID. In those environments, the PPS and Composite Instances must be able to carry the Admission ID rather than the Patient ID. This is especially true for the unscheduled procedure case, where some patient identifier must be entered at the modality; the identifier most readily available may be the Admission ID. Note that when the acquisition is identified by Admission ID in the unknown patient case, the Patient ID only needs to be added (not coerced to a different value) when patient information reconciliation occurs.</p>
