

DICOM Correction Item

Correction Number CP-574	
Log Summary: Add specific character set attribute to the Print related N-CREATES	
Type of Modification Addition/Clarification	Name of Standard PS 4
Rationale for Correction: The Specific Characterset (0008,0005) attribute is not listed for the Basic Film Session N-CREATE command. It is included as part of SOP common for the composite instances. It needs to be explicitly listed for the normalized services. It is not added to the N-SET because it could introduce significant ambiguity if it is permitted to change after the create.	
Sections of documents affected PS 4, table H.4-2 PS 4, section H.4.2.2.1.3	
Correction Wording:	

Add to table H.4-2, for Basic Film Session N-CREATE

**Table H.4-2
 N-CREATE ATTRIBUTE LIST**

Attribute Name	Tag	Usage SCU/SCP
...		
Specific Character Set	(0008,0005)	U/U

Modify **H.4.2.2.1.3 Behavior**

If supported, the SCP shall create Basic Annotation Box SOP Instances for each Annotation Box defined by the Attribute Annotation Display Format ID and shall append the SOP Class/Instance UID pair of the created Basic Annotation Box SOP Instance to the Referenced Annotation Box Sequence Attribute of the parent Basic Film Box SOP Instance to link each Basic Annotation Box SOP Instance to the Basic Film Box SOP Instance. The SCP returns the list of Basic Annotation Box SOP Class/Instance UID pairs in the Attribute Referenced Annotation Box Sequence of the N-CREATE response message. **The Annotation Boxes shall support the same character sets as the Basic Film Box.**

The character set supported by the Film Box shall be the same as the character set of the Basic Film Session.
