

DICOM Correction Item

Correction Number		CP-605
Log Summary: Add informative mapping of BARI to SNOMED		
Type of Modification	Name of Standard	
Addition	PS 3.16 2004	
Rationale for Correction		
<p>An informative mapping of the BARI codes of CID 3014 to SNOMED is added. BARI was selected as the coding scheme for 3014 for consistency with cardiac evidence-based medicine, and because it includes anatomy not currently covered in SNOMED; however, SNOMED would be useful for more generic anatomic description and decision support. (The exercise of preparing this CP also allows the determination of additional terms to be requested for inclusion in SNOMED.)</p> <p>Part 16 allows listing of equivalent codes from a comparable reference terminology in the Context Groups, and this is done for CID 3014. Note that since there is no change to the fundamental terms of CID 3014, the version ID does not need to be changed.</p>		
Sections of documents affected		
PS 3.16 CID 3014		
Correction Wording:		

CID 3014 Coronary Artery Segments

**Context ID 3014
 Coronary Artery Segments**

Type: Extensible Version: 20020904

Coding Scheme	Coding Scheme Version	Code Value	Code Meaning	<u>SNOMED (SRT) Equivalent</u>
BARI	1992	15	1st Diagonal Coronary Artery	<u>T-43117</u>
BARI	1992	24	1st Left Posterolateral Coronary Artery	<u>T-4312B</u>
BARI	1992	20	1st Marginal Coronary Artery	<u>T-43128</u>
BARI	1992	6	1st Right posterolateral <u>Coronary Artery</u>	<u>T-43213</u>
BARI	1992	17	1st Septal Coronary Artery	<u>T-43002</u>
BARI	1992	16	2nd Diagonal Coronary Artery	<u>T-43118</u>
BARI	1992	25	2nd Left Posterolateral Coronary Artery	<u>T-4312C</u>
