

DICOM Correction Item

Correction Number	CP-640
Log Summary: Clarify Role Negotiation Response	
Type of Modification	Name of Standard
Clarification	PS 3.7 2006
Rationale for Correction	
The The SCP/SCU role selection negotiation does not explicitly forbid an Association-acceptor from responding "1" when the Association-requester has proposed "0" for a role. This clarifies that such behavior is not allowed.	
Sections of documents affected	
PS 3.7 Annex D	
Correction Wording:	

D.3.3.4 SCP/SCU ROLE SELECTION NEGOTIATION

...

The Association-acceptor, for each SCP/SCU Role Selection item offered, either accepts the Association-requester proposal by returning the same value (1) or turns down the proposal by returning the value (0). **The Association-acceptor shall not return the value (1) if the Association-requester has not proposed the role, i.e., it has sent a value (0). The Association-requester shall ignore the response if it has not proposed the role.**
